Charcoal Blood

Charcoal and Blood is a detailed account of a heinous crime perpetrated on Italian immigrants engaged in the production of charcoal on Nevada's mining frontier at the close of the nineteenth century. On August 18, 1879, in a canyon near Fish Creek, outside Eureka, Nevada, five Italian charcoal burners were slain and six more were wounded, while fourteen were taken prisoner by a sheriff's posse. Through meticulous research on the event, relying on such primary sources as newspaper articles, author Silvio Manno provides the only comprehensive account of Eureka's charcoal crisis and what came to be known as the Fish Creek Massacre. This is a well-documented narrative history of an important instance of class and ethnic conflict in the West. Readers interested in Nevada history, Italian American history, frontier trade unionism, and mining in the West will find this book a unique examination of an incident that occurred almost a century and a half ago and that has, until now, been largely overlooked.

Charcoal and Blood is a detailed account of a heinous crime perpetrated on Italian immigrants engaged in the production of charcoal on Nevada's mining frontier at the close of the nineteenth century. The 287-mile stretch of highway that runs east to west across Nevada's desert is billed as the "Loneliest Road in America." But those who explore it find there is plenty to discover along the way in the towns of Austin, Eureka, Ely, Fallon and Fernley. Every one of these places has its own unique history, ghosts and stories to tell. From the sordid lynching of Richard Jennings to the humorous legend about a famous sack of flour, author Janice Oberding treks across Highway 50 seeking spirits and uncovering the tales of Singing Sand Mountain, the Red-Headed Giants, the Giroux Mine Disaster and many more.

In this carefully researched and engaging book, Kenneth Scambray surveys the lives and contributions of Italian immigrants in thirteen western states. He covers a variety of topics, including the role of the Roman Catholic Church in attracting and facilitating Italian settlement; the economic, political, and cultural contributions made by Italians; and the efforts to preserve Italian culture and to restore connections to their ancestral identity. The lives of immigrants in the West differed greatly from those of their counterparts on the East Coast in many ways. The development of the West—with its cheap land and mining, forestry, and agriculture industries—created a demand for labor that enabled newcomers to achieve stability and success. Moreover, female immigrants had many more opportunities to contribute materially to their family's well-being, either by overseeing new revenue streams for their farms and small businesses, or as paid workers outside the home. Despite this success, Italian immigrants in the West could not escape the era's xenophobia. Scambray also discusses the ways that Italians, perceived by many as non-White, interacted with other Euro-Americans, other immigrant groups, and Native Americans and African Americans. By placing the Italian immigrant experience within the context of other immigrant narratives, Italian immigration in the American West provides rich insights into the lives and contributions of individuals and families who sought to build new lives in the West. This unique study reveals the impact of Italian immigration and the immense diversity of the immigrant experience outside the East's urban centers.

The United States has a long and unfortunate history of exposing employees, the public, and the environment to dangerous work. But in April 2009, the spotlight was on Las Vegas when the Pulitzer committee awarded its public service prize to the Las Vegas Sun for its coverage of the high fatalities on Las Vegas Strip construction sites. The newspaper attributed failures in safety policy to the recent "exponential growth in the Las Vegas market." In fact, since Las Vegas' founding in 1905, rapid development has always strained occupational health and safety standards. Gambling with Lives examines the work, hazards, and health and safety programs from the early building of the railroad through the construction of the Hoover Dam, chemical manufacturing during World War II, nuclear testing, and dense megaresort construction on the Las Vegas Strip. In doing so, this comprehensive chronicle reveals the long and unfortunate history of exposing workers, residents, tourists, and the environment to dangerous work—all while exposing the present and future to crises in the region. Complex interactions and beliefs among the actors involved are emphasized, as well as how the medical community interpreted and responded to the risks posed. Updated through 2020, this second edition includes new and expanded discussions on: Union activity, sexual harassment and misconduct, and race and employment The change to Las Vegas' "What happens here, stays here" slogan The MGM Grand Fire and 1918 influenza pandemic Work-related musculoskeletal disorders in the service industry Legionnaire's Disease outbreaks at resorts Effects of the Route 91 Harvest Festival Shooting The COVID-19 pandemic Few places in the United States contain this mixture of industrial and postindustrial sites, the Las Vegas area offers unique opportunities to evaluate American occupational health during the twentieth century, and reminds us all about the relevancy of protecting our workers.

Nevada's politics are in large measure the result of its turbulent history and harsh environment. Michael W. Bowers' concise volume explains the dynamics of the political formation process, which is strikingly unique among the fifty states. Even today, Nevada is unlike the other states in its politics and culture: it's economically right, yet libertarian, the home of widespread gaming and a 24/7 lifestyle, has a high percentage of federally-owned lands, and has one of the highest rates of urbanism in the U.S., yet is often governed by rural legislators. This comprehensive and insightful explanation discusses how Nevada's history has shaped its political culture, and how its government operates today. The Sagebrush State serves as a highly readable and accessible text for the study of Nevada's political history and constitution, which is a graduation requirement at the state's colleges and universities. The fifth edition is updated through 2017 and includes the full text of the state constitution with extensive annotations of all amendments to the original 1864 document.

The Sagebrush State serves as a highly readable and accessible text for the study of Nevada's political history and constitution, which is a graduation requirement at the state's colleges and universities. The sixth edition is updated through 2020 and includes the latest changes in the selection process of municipal court judges in the state, the resurgence of the Democrats after their losses in 2016, and the full text of the state constitution with extensive annotations of all amendments to the original 1864 document. It also examines the effects of the COVID-19 pandemic and the resulting economic downturn on the state's budget.

California-cool grilling wisdom from one of the most renowned chefs in Los Angeles. Josiah Citrin is one of the biggest names in the L.A. food world and his restaurant, Mélisse, is a temple for fine dining. But his hot new restaurant, Charcoal Venice, is devoted to the kind of cooking he does at home for his friends and family--backyard cookouts where a pile of coals and seasonal ingredients are all a home cook needs to create an unforgettable meal. In Charcoal, Citrin presents completely fresh ways to cook with fire and charcoal, not only grilling over the coals, but cooking inside them and finding inventive methods for searing and smoking. Whether Citrin's grilling barbecue classics like J1-Marinated Skirt Steak and Salt-Baked Whole Maine Lobster or West Coast-inspired vegetable sides like his signature Cabbage Baked in Embers, charcoal is the dynamic center of this cookbook. Unlike other grilling books, vegetables get equal billing with meat. For Citrin, the color, texture, and flavors of vegetables are endlessly inspiring. With almost 100 recipes for savory main dishes and sides, as well as desserts and even cocktails, Charcoal shows that the satisfaction of smoky flavor and a good char knows no bounds. It is a celebration of the universal human craving to gather together and cook over a live fire.

Si parla tanto dei giovani che emigrano, ma poco sappiamo delle loro famiglie. Questo volume punta l'attenzione proprio su chi resta: i genitori. In particolare, analizza le relazioni economiche che si stabiliscono all'interno delle nuove famiglie transnazionali: quanto spendono i genitori per aiutare i figli a conseguire una formazione superiore o a costruirsi una carriera lavorativa soddisfacente in un altro paese? Quanto costa cercare di tenere assieme la famiglia, seppure temporaneamente, per esempio attraverso viaggi e soggiorni dei genitori all'estero e i ritorni occasionali dei figli a casa? E quali sono le prospettive di una futura riunificazione familiare? Ma anche, come cambia la famiglia italiana con questa nuova emigrazione, è vero che sta diventando sempre più cosmopolita? Qui abbiamo genitori che viaggiano all'estero con frequenze mai viste prima, che imparano nuove lingue in età avanzata per dialogare con i nipoti, che consultano la posta elettronica e dialogano disinvoltamente via Skype o WhatsApp. Attraverso i risultati di un'inchiesta condotta on line tra le famiglie italiane dei giovani migranti e le testimonianze dei diretti interessati (genitori e figli), la ricerca esplora le nuove relazioni familiari, declinate anche in termini economici, confermando l'importanza del sostegno della famiglia, soprattutto nelle fasi iniziali, alla vita dei figli all'estero.
