A former CIA operations officer explains how corporations can profit from from the booming field of business intelligence.

This realistic New York Times bestselling epic spy novel captures the thrilling story of CIA agents in the latter half of the Twentieth Century. The New York Times bestselling spy novel *The Company* lays bare the history and inner workings of the CIA. This critically acclaimed blockbuster from internationally renowned novelist Robert Littell seamlessly weaves together history and fiction to create a multigenerational, wickedly nostalgic saga of the CIA—known as "the Company" to insiders. Racing across a landscape spanning the legendary Berlin Base of the '50s, the Soviet invasion of Hungary, the Bay of Pigs, Afghanistan, and the Gorbachev putsch, *The Company* tells the thrilling story of agents imprisoned in double lives, fighting an amoral, elusive, formidable enemy—and each other—in an internecine battle within the Company itself. "Compulsive reading from start to finish." *The Boston Globe* "Hugely entertaining . . . A serious look at how our nation exercises power. . . . Popular fiction at its finest." *The Washington Post Book World* "As it happens, this longest spy novel ever written turns out to be one of the best." *Chicago Tribune* "Reads like a breeze . . . guaranteed to suck you right back into the Alice-in-Wonderland world of spy vs. spy." *Newsweek* "If Robert Littell didn't invent the American spy novel, he should have." *Tom Clancy* "It's gung-ho, hard-drinking, table-turning fun." *Publishers Weekly*

The book the CIA wanted to keep off the bookshelves! In the murky world of espionage, where shadowy intelligence operatives struggle against one another to gain tactical advantage, things can often go very, very wrong. This is one such story. Told by a former master CIA spy, truth is woven with

fiction to create a gripping yet authentic action packed tale of real intelligence operatives at war.

A young, female CIA officer under non-official cover has been snatched off of the streets of Beirut by Hezbollah. This is the kind of situation that CIA's legendary Deputy Director of Operations Edwin Rothmann needs solved fast—but he can't involve the agency. Instead, he enlists the renegade Ft. Lauderdale outfit he refers to as "CIA, Inc." headed by former CIA case officer Mac MacMurphy. As the kidnapped officer faces a battle of wits with her mysterious interrogator, MacMurphy and his team track down a former CIA asset who may hold the key to infiltrating the hostage situation before it gets out of hand.

When the CIA can't get the job done, its legendary director of operations turns to "Mac" MacMurphy, in this exciting sequel to Rustmann's first best-selling novel, *The Case Officer*. Mac is the best. A proven talent in fighting fire with fire. Able to be as ruthless as any enemy, showing no mercy where none is due. The perfect man to pit against an out-of-control drug lord who has declared war on the U.S. Consulate in Northern Thailand. But do the ends justify the means? Is it worth the risk of collateral damage—and there will be some when Mac is involved—to bring down the unscrupulous drug king? These are the moral conundrums facing Mac and his team as they embark on a slippery slope upon which there is no turning back, and they prepare for the fight of their lives against a veritable army of heavily armed drug merchants in the steamy jungles of the Golden Triangle. And they really don't bother Mac a bit. Unusual challenges require unorthodox responses. And wouldn't you know it, there's a woman involved!

At the intersection of politics, law and national security--from "protect us at all costs" to "what the hell have you guys been up to, anyway?"--A lawyer's life in the CIA. Under seven presidents and 11 different CIA directors, Rizzo rose to become the CIA's most powerful career attorney. Given the agency's dangerous and secret mission, spotting and deterring possible abuses of law, offering guidance and protecting personnel from legal jeopardy was, and remains, no easy task. The author accumulated more than 30 years of war stories, and he tells most of them.

What happens when the world of venture capital collides with the world of espionage? To find the answer, Jonathan E. Lewis takes us inside the executive suite at Itek Corporation during the Cold War years from 1957 to 1965. Itek was manufacturing the world's most sophisticated satellite reconnaissance cameras, and the information these cameras provided about Soviet missiles and military activity was critical to U.S. security. So was Itek. This intriguing book examines in unprecedented detail the challenges Itek faced not only as a contractor for the most important national security program of the time—the CIA's Project CORONA spy satellite—but also as a start-up company competing with established industrial giants. In telling the story of Itek Corporation, Lewis fills important gaps in the history of American intelligence, business history, and management studies. In addition, he addresses a variety of important themes such as the compatibility of secrecy and capitalism, the struggle between profits and patriotism, and the workings of power and connections in America. Lewis explores how Itek executives contended with myriad business problems that were compounded by the need to raise capital without revealing the complete truth about the company's highly secret business. He also presents for the first time information about Laurance Rockefeller's venture capital operations and his role in financing Itek, based on the financier's private Itek papers. The book is both a remarkable case study of a company at the heart of the American intelligence-industrial complex during the Cold War and a thought-provoking examination of the impact of the CIA on the capitalist system it was created to defend.

The book you are holding will fundamentally change the way you look at the collection, compartmentalization, analysis, distribution, application, and

protection of intelligence in your business. J. C. Carleson's presentation of years of spy tradecraft will make you a more effective force within your organization. James Childers, CEO, ASG Global, Inc. When J. C. Carleson left the corporate world to join the CIA, she expected an adventure, and she found it. Her assignments included work in Iraq as part of a weapons of mass destruction search team, travels throughout Afghanistan, and clandestine encounters with foreign agents around the globe. What she didn't expect was that the skills she acquired from the CIA would be directly applicable to the private sector. It turns out that corporate America can learn a lot from spies—not only how to respond to crises but also how to achieve operational excellence. Carleson found that the CIA gave her an increased understanding of human nature, new techniques for eliciting information, and improved awareness of potential security problems, adding up to a powerful edge in business. Using real examples from her experiences, Carleson explains how working like a spy can teach you the principles of: Targeting—figuring out who you need to know and how to get to them Elicitation—a subtle way to get the answers you need without even asking a question Counterintelligence—how to determine if your organization is unwittingly leaking information Screening—CIA recruiters' methods for finding and hiring the right people The methods developed by the CIA are all about getting what you want from other people. In a business context, these techniques apply to seeking a new job, a promotion, a big sale, an advantageous regulatory ruling, and countless other situations. As Carleson writes, "In a world where information has a price, it pays to be vigilant." Her book will show you how.

Call me naïve, but when I was a girl—watching James Bond and devouring Harriet the Spy—all I wanted was to grow up to be a spy. Unlike most kids, I didn't lose my secret-agent aspirations. So as a bright-eyed, idealistic college grad, I sent my resume to the CIA. Getting in was a story in itself. I peed in more cups than you could imagine, and was nearly condemned as a sexual deviant by the staff psychologist. My roommates were getting freaked out by government investigators lurking around, asking questions about my past. Finally, the CIA was training me to crash cars into barriers at 60 mph. Jump out of airplanes with cargo attached to my body. Survive interrogation, travel in alias, lose a tail. One thing they didn't teach us was how to date a guy while lying to him about what you do for a living. That I had to figure out for myself. Then I was posted overseas. And that's when the real fun began.
