Equality is a widely championed social ideal. But what is equality? And what action is required if present-day societies are to root out their inequalities? The Equal Society collects fourteen philosophical essays, each with a fresh perspective on these questions. The authors explore the demands of egalitarian justice, addressing issues of distribution and rectification, but equally investigating what it means for people to be equals as producers and communicators of knowledge or as members of subcultures, and considering what it would take for a society to achieve gender and racial equality. The essays collected here address not just the theory but also the practice of equality, arguing for concrete changes in institutions such as higher education, the business corporation and national constitutions, to bring about a more equal society. The Equal Society offers original approaches to themes prominent in current social and political philosophy, including relational equality, epistemic injustice, the capabilities approach, African ethics, gender equality and the philosophy of race. It includes new work by respected social and political philosophers such as Ann E. Cudd, Miranda Fricker, Charles W. Mills, and Jonathan Wolff.

Nothing provided

This volume brings the remarkable writings of Russian liberal thinker Boris Nikolaevich Chicherin (1828-1904) to English-language readers for the first time. The collection includes key essays in which Chicherin addresses the central political and social problems that confronted Russia from 1855 to the opening years of the twentieth century. Chicherin's ideological alternatives to the Bolshevik plan for revolutionary transformation of Russia not only provide valuable historical insights, but also are highly relevant to current political discussion of liberalism in Russia and in the West. In a comprehensive introduction to the book, G. M. Hamburg discusses the development of Chicherin's thought and places it in historical context. Chicherin, Hamburg says, was a powerful and sophisticated but often misunderstood defender of civil and political rights. Like his fellow liberals in Russia, Chicherin was heavily influenced by German idealism and particularly by Hegel. He departed from many, however, in favoring a market economy and advocating that reform efforts be tailored to local conditions and traditions. In this collection Chicherin explores such contemporary issues as the abolition of serfdom, Russian education, and the need for a constitution. He also tackles broad philosophical problems--the nature of liberty and equality, styles of political discourse--and comments on such philosophers as Plato, Aristotle, More, Machiavelli, Montesquieu, Hegel, and Marx.

In a future world, only one man dares to think, strive, and love as an individual in the midst of a paralyzing collective humanity.

Antony Flew is one of the most well-known and respected philosophers alive today. In *Philosophical Essays*, twelve of Flew's most significant works are gathered together for the first time, creating a unique and valuable collection. The book begins with a new autobiographical sketch of Flew's life and career. In addition to some of the distinguished scholar's most influential and famous articles, *Philosophical Essays* includes a number of rare works that have not been available to a wide audience until now. This important book will be an essential addition to the library of any philosopher.

Since initiating the journal *Social Indicators Research* in 1974, Alex C. Michalos has been a pioneer in social indicators and quality-of-life research. This collection of nineteen articles provides an overview of nearly 30 years of work, including papers drawn from diverse sources and papers never published before. The final paper, on multiple discrepancies theory (MDT), is the author's unique contribution to an empirically testable new foundation for theories of utility, satisfaction and happiness.

Narratives of mixed-race people bringing claims of racial discrimination in court, illuminating traditional understandings of civil rights law As the mixed-race population in the United States grows, public fascination with multiracial identity has promoted the belief that racial mixture will destroy racism. However, multiracial people still face discrimination. Many legal scholars hold that this is distinct from the discrimination faced by people of other races, and traditional civil rights laws built on a strict black/white binary need to be reformed to account for cases of discrimination against those identifying as mixed-race. In *Multiracials and Civil Rights*, Tanya Katerí Hernández debunks this idea, and draws on a plethora of court cases to demonstrate that multiracials face the same types of discrimination as other racial groups. Hernández argues that multiracial people are primarily targeted for discrimination due to their non-whiteness, and shows how the cases highlight the need to support the existing legal structures instead of a new understanding of civil rights law. The legal and political analysis is enriched with Hernández's own personal narrative as a mixed-race Afro-Latina. Coming at a time when explicit racism is resurfacing, Hernández's look at multiracial discrimination cases is essential for fortifying the focus of civil rights law on racial privilege and the lingering legacy of bias against non-whites, and has much to teach us about how to move towards a more egalitarian society.

G. A. Cohen was one of the most gifted, influential, and progressive voices in contemporary political philosophy. At the time of his death in 2009, he had plans to bring together a number of his most significant papers. This is the first of three volumes to realize those plans. Drawing on three decades of work, it contains previously uncollected articles that have shaped many of the central debates in political philosophy, as

well as papers published here for the first time. In these pieces, Cohen asks what egalitarians have most reason to equalize, he considers the relationship between freedom and property, and he reflects upon ideal theory and political practice. Included here are classic essays such as "Equality of What?" and "Capitalism, Freedom, and the Proletariat," along with more recent contributions such as "Fairness and Legitimacy in Justice," "Freedom and Money," and the previously unpublished "How to Do Political Philosophy." On ample display throughout are the clarity, rigor, conviction, and wit for which Cohen was renowned. Together, these essays demonstrate how his work provides a powerful account of liberty and equality to the left of Ronald Dworkin, John Rawls, Amartya Sen, and Isaiah Berlin.

This collection of essays, organized around the theme of the struggle for equality in the United States during the nineteenth and twentieth centuries, also serves to honor the renowned Civil War historian James McPherson. Complete with a brief interview with the celebrated scholar, this volume reflects the best aspects of McPherson's work, while casting new light on the struggle that has served as the animating force of his lifetime of scholarship. With a chronological span from the 1830s to the 1960s, the contributions bear witness to the continuing vigor of the argument over equality. Contributors

The second edition of this widely-acclaimed book about the Equality Act 2010 by one of its leading architects brings forward the story of how and why this historic legislation was enacted and what it means, to cover the first four years of its implementation by the Coalition Government and in the courts. This includes an assessment of amendments to the legislation, the reduction in the powers and budget of the Equality and Human Rights Commission and the imposition of tribunal fees, as well as a discussion of possible future directions of equality law and policy. From the Foreword to the first edition by Lord Lester of Herne Hill QC 'This is no ordinary law book, and its author is no ordinary lawyer. The book, like the Equality Act 2010 which it describes and discusses, is a major landmark in the long struggle for effective legal protection of equal rights and equal treatment without direct or indirect discrimination. It places the law in its political, economic and social context and traces its often contested and controversial legal history...'.
