BFH, A MANUAL FOR FLUENT HANDWRITING is a complete package for the achievement of legible fast handwriting. Clear, rapid handwriting can be learned when its relationship to easy, natural, rhythmic movements of the hand is understood. Teaching methods presented in the manual were developed over a period of 17 years of elementary classroom experience. The CD-ROM includes lesson plans to be printed out as is for students to use as exemplars, or they may be edited to suit the interests of the students. The beginners' section is designed to be fun for children to use independently. The font of an exemplary alphabet is also included to allow one to create custom pages. A first-grade teacher says, "BFH is an instructor's dream when it comes to penmanship." Rosemary Sassoon, Ph.D., handwriting specialist & author, says, "It provides practical advice, original teaching ideas, & well thought out exercises for all stages." A former student says, "My handwriting has been of great value in my life. I am able to write quickly & neatly..." Order from Swansbury, Inc., P.O. The past two decades have witnessed startling advances in wireless LAN technologies that were stimulated by its increasing popularity in the home due to ease of installation, and in commercial complexes offering wireless access to their customers. This book presents some of the latest development status of wireless LAN, covering the topics on physical layer, MAC layer, QoS and systems. It provides an opportunity for both practitioners and researchers to explore the problems that arise in the rapidly developed technologies in wireless LAN.

Computational Chemistry serves as a complement to experimental chemistry where the tools are limited. Using computational programs to solve advanced problems is widely used in the design and analysis of for example new molecules, surfaces, drugs and materials. This book will present novel innovations in the field, with real-life examples of where computational technologies serves as an indispensable tool.

A simple holiday romance is all that Carla Walker wants. But when Philip Garrison strolls into her life, she gets more than she bargains for.

Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce major challenges to health and survival. Because students who take this fastest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. The authors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives. Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging, race/racism and health, mental health, and healers and healing.

It's not what you do, it's how you think about what you do. A must-have resource for any educator working toward student achievement at ever-higher levels, 10 Mindframes for Leaders: The VISIBLE LEARNING® Approach to School Success brings the mindframes of ten world-renowned educators to life. Each chapter, written by a different thought leader, details a mindframe at the heart of successful school leadership. It includes: · The most current, up-to-date findings from the Visible Learning research, including the factors from Visible Learning that support each mindframe · Practical ideas for leaders to implement high-impact strategies in classrooms and schools · Resources to help educators clarify and refine their own mindframes
