A surprising true story of Isaac Newton's boyhood suggests an intellectual development owing as much to magic as science. Before Isaac Newton became the father of physics, an accomplished mathematician, or a leader of the scientific revolution, he was a boy living in an apothecary's house, observing and experimenting, recording his observations of the world in a tiny notebook. As a young genius living in a time before science as we know it existed, Isaac studied the few books he could get his hands on, built handmade machines, and experimented with alchemy—a process of chemical reactions that seemed, at the time, to be magical. Mary Losure's riveting narrative nonfiction account of Isaac's early life traces his development as a thinker from his childhood, in friendly prose that will capture the attention of today's budding scientists—as if by magic. Back matter includes an afterword, an author's note, source notes, and a bibliography.

Isaac Titsingh was intermittently head of the Japan factory (trading station) of the Dutch East India Company 1780-94. He was a career merchant, but unusual in having a classical education and training as a physician. His impact in Japan was enormous, but he left disappointed in the ability of the country to embrace change. After many years in Java, India and China, he came to London, and then settled in Paris where he devoted himself to compiling translations of prime Japanese texts. It is one of the most exciting anthologies of the period and reveals the almost unknown world of eighteenth-century Japan, discussing politics, history, poetry and rituals. The Illustrations of Japan appeared posthumously in 1821-1822 in English, French and Dutch. This fully annotated edition makes the original English version available for the first time in nearly two centuries

The central theme of the papers read at the conference about the Aqedah is the history of reception of Genesis 22: The Sacrifice of Isaac. After observations related to the biblical text and human sacrifice in Ancient Israel, the sacrifice of Iphigeneia is studied, followed by papers about the reception of the Aqedah in Qumran, in Jubilees, in Rabbinical and in Christian Syriac traditions, finally in a recently published poem in the Bodmer papyri and in the Koran. Important contributions are made by the history of art. Two essays in this volume study the older iconography and the Aqedah in Italian art. The reception in modern times: Kierkegaard, a gender-motivated and a psychoanalytical reading can be found in the last part of the volume. The studies published in this volume bring surprising and oft neglected aspects of the famous narrative to light. How in different times and in different circles Genesis 22 has been interpreted is an encouragement for hermeneutical reflection and a help for exegesis itself.

Nobel Prize-winning author Isaac Bashevis Singer stands virtually alone among prominent writers for being more widely known through translations of his work than through the original texts. Yet readers and critics of the Yiddish originals have long pointed out that the English versions are generally shortened, often shorn of much description and religious matter, and their perspectives and denouements are significantly altered. In short, they turn the Yiddish author into a Jewish-American English writer, detached from of his Eastern European Jewish literary and cultural roots. By contrast, this collection of essays by leading Yiddish scholars seeks to recover the authentic voice and vision of the writer known to his Yiddish readers as Yitskhok Bashevis. The essays are grouped around four themes: The Yiddish language and the Yiddish cultural experience in Bashevis's writings Thematic approaches to the study of Bashevis's literature Bashevis's interface with other times and cultures Interpretations of Bashevis's autobiographical writings A special feature of this volume is the inclusion of Joseph Sherman's new, faithful translation of a chapter from Bashevis's Yiddish "underworld" novel Yarme and Keyle.

Having fled life in pre-World War II East Prussia for the safety of Cambridge, Isaac and Lulu Fabian find themselves placed in an internment camp by the British government along with thousands of fellow Jewish Germans, where they endure suspicion, prejudice, and other hardships. 25,000 first printing.

Literary surrealism at its most profound, The Ascent of Isaac Steward follows one man's journey into his own mind as he struggles to come to terms with the trauma that has reshaped his life. A year on from the car crash in which his wife Rebekah and son Esau were killed and his other son Jacob left in a coma, Isaac Steward has suppressed every memory of that fateful day. Yet fate seems determined to make him remember, driving Isaac deeper and deeper into himself. Slowly, dysfunction builds on delusion, as childhood memories compete with a persona he has fabricated to regress to an earlier, happier time. Violence, death and destruction result as Isaac gradually loses his grip on reality. His half-brother Ishmael tells him that he must return to the wood at his childhood home, to a tree he called The Dandelion Tree, if he is ever to be reunited with Rebekah. But as he descends further, he starts to question his own existence.
