A provocative and entertaining look at the psychology of superstition and religion, how they make us human—and how we can use them to our advantage What is so special about touching a piano John Lennon once owned? Why do we yell at our laptops? And why do people like to say, "Everything happens for a reason"? Drawing on cognitive science, anthropology, and neuroscience, Matthew Hutson shows us that magical thinking is not only hardwired into our brains—it's been a factor in our evolutionary success. Magical thinking helps us believe that we have free will and an underlying purpose as it protects us from the paralyzing awareness of our own mortality. Interweaving entertaining stories, personal reflections, and sharp observations, The 7 Laws of Magical Thinking reveals just how this seemingly irrational process informs and improves the lives of even the most hardened skeptics.

In this witty and perceptive debut, a former editor at Psychology Today shows us how magical thinking makes life worth living. Psychologists have documented a litany of cognitive biases- misperceptions of the world-and explained their positive functions. Now, Matthew Hutson shows us that even the most hardcore skeptic indulges in magical thinking all the time-and it's crucial to our survival. Drawing on evolution, cognitive science, and neuroscience, Hutson shows us that magical thinking has been so useful to us that it's hardwired into our brains. It encourages us to think that we actually have free will. It helps make us believe that we have an underlying purpose in the world. It can even protect us from the paralyzing awareness of our own mortality. In other words, magical thinking is a completely irrational way of making our lives make rational sense. With wonderfully entertaining stories, personal reflections, and sharp observations, Hutson reveals our deepest fears and longings. He also assures us that it is no accident his surname contains so many of the same letters as this imprint.

Why do rational people buy notions that seem utterly incredulous? (And that includes you.) Everyone – even the most jaded and sceptical – believes in 'magic', in the form of luck, mind over matter, the power of similarities, jinxes, and destiny. In this wonderful exploration of psychology, Matthew Hutson takes us on a fascinating tour of magical thinking in everyday life, revealing the healing power of John Lennon's piano; the reason gamblers kiss their tickets; and why admitting you have no free will staves off addiction.

The Ancient Hermetic Secrets to Alchemy and Divine Magic Revealed! You have natural magical abilities that can elevate your life to a whole new level, as well as heal and help your loved ones and clients. The original teacher of this Divine magic was an Egyptian sage named Hermes Trismegistus. His teachings, called "Hermetics," were only taught verbally or in very cryptic writings. In 1908, three Hermetic students recorded them in a book called The Kybalion. Yet this work was still difficult to understand because of its archaic and confusing language. Now, in Divine Magic, Doreen Virtue presents a clear, edited version of The Kybalion, written in understandable and modern language while retaining all of the original teachings. She gives comments and practical suggestions based upon her own success in using Hermetic teachings for healing and manifestation. With Divine Magic, you can master your moods, release negativity, manifest new levels of abundance, and attract wonderful opportunities in all areas of your life.

A book of magic tricks for a younger audience.

This book, entitled "How to Fly like an Eagle," is a motivational book written by the author in French, Spanish, and English to help people learn the techniques and to get the skills to help them to fly to the top like that bird of prey which is the eagle. In this book, the readers will learn how to overcome obstacles and to cultivate the fruit of persistence which is an essential factor in the process of transformation of desire into its monetary equivalent. The basis of persistence is the power of will. When this power and desire combine correctly, they form an irresistible combination, the perfect one to help you overcome your failures. There are four simple steps which lead to the habit of persisistence. This does not require a large amount of intelligence or a special education, but time and minimal effort. The four steps are as follows: 1- A target set backed by a burning desire to achieve it. 2- A definite plan, expressed in continuous action. 3- A closed mind to any negative influence (including negative suggestions of relatives, friends and others). 4- A harmonious agreement with one or more persons, able to lead someone to go forward with the plan and with the goal. These four steps are essential for success in all areas of life. These are the steps with which you can control your economic destiny. These are the steps that lead to freedom and independence of thought, that convert dreams into reality. These are the steps that lead to the domination of fear, discouragement and indifference. I do not know the situation you are facing currently, maybe you are in a wheelchair, or in a hospital bed and without any hope of survival, maybe you're on the verge of divorce, or you are unable to complete your schooling or university, or find a job. You can now be crawling like a snake or you have broken wings preventing you from being able to fly like an eagle, but one thing is certain, regardless of your economic, family, health situation you can have a better life, develop your potential and fly as high as the eagle above any obstacles or constraints you are facing right now. Of course, this will be possible if you apply the principles to be taught in this book. I testify to you with all my heart that this book has the power to transform the lives of people from nothing to excellence, from the dust of the ground to the top of success. I promise you if you read it, and put the principles into practice, your life will be completely blessed!

Megan Conroy thinks she has problems; she's struggling to pass math and with only one year of high school left she still has no idea what she wants to do with her life. She certainly never thought she'd become a witch. A near miss from a speeding car triggers an inexplicable rush of power within her, leading to strange, recurring dreams and encounters with even stranger creatures. After being saved from a demon by her classmate Finn, she finally starts getting some answers. Meg, he explains, is now an awakened witch; a person whose dormant magic has been brought out by trauma. Real witches, she learns, are nothing like the broomstick-riding figures she's used to from movies. The descendants of an ancient tribe who made an alliance with the Fae, Witani are born with magic and have the ability to see the spirits who oversee the natural world. She receives another shock looking through study abroad brochures when she finds a picture of the same standing stone from her dreams. This prompts her to choose Scotland as her destination, where the stone is located. As she's drawn ever deeper into the secret world of magic and Fae, she wrestles with the dilemma of whether or not to tell her parents about her new life. But it's not long before she has far more to worry about. Her arrival in Scotland sets a series of events in motion that will change her forever, bringing with it new friends, love, and danger.

Olivia believes in miracles, magic and fairy folk and always will. Her brother, Sam, a temperamental, sceptical cynic doesn't and never will. But when a gust of wind in her dad's old potting shed dislodges a wand and a hidden book that are positively ancient, it writes itself. Then things get seriously strange for Olivia, her brother, mother, father and friends as ghostly occurrences seem to be the order of the day.
